

To the Judges,

Assalamualaikum. My name is Rayhan Ahsan and I am in 12th Grade. For my Senior Project I have tackled the problem of Drug Abuse in our Muslim Community. When I first started working on this project, I had very low expectations on what I would learn. However, when I began my research I was utterly shocked with results I found. The more I researched, the more I felt like this problem had to be worked on. After several months on this project, I have seen so many things and today I would like to take the opportunity to inform you of some of the things I have read about. I would also like to thank you personally for taking time out today and coming to judge our projects. I will try my best to reach your expectation and I hope you take something good away from this presentation.

-Rayhan Ahsan, 12th Grade MIA Student
